

BIG LIE. CHERNOBYL 20 YEARS LATER

Joint initiative by Alla Yaroshinskaya and Rosalie Bertell on 20th anniversary of Chernobyl catastrophe

“And the third angel sounded; and there fell a great star from heaven, burning as it were a lamp_ and it fell upon the third part of the river, and upon the fountains of waters; and the name of the star is called Wormwood: and third part of the waters became wormwood; and many men died of the waters, because they were made bitter”.

Revelations 8.

“Chernobylnik: a variety of absinthe (wormwood) with red-brown or deep purple stem”.

S.Ozhegov.Dictionary of the Russian language.

The 20th anniversary of the Chernobyl catastrophe (April 26, 2006) is an appropriate time to remind people and authorities world-wide and inform them about current facts involving the largest nuclear power plant catastrophe in human history and its planetary consequences. The impact is truly enormous – it equals at least 300 Hiroshima. 9, 000, 000 people still are living in the effected zones and now forgotten by society and authorities. They need immediate national and international attention so they may receive the help to survive.

There are some facts on Chernobyl catastrophe:

- the USSR communist's authorities 3 years lied that nothing happened in Chernobyl and millions people did not know that they leave and breath and eat in contaminated areas. The people in 16 region of the Russian Federation were known on that in 6 years after explosion!
- hundreds tons of contaminated meet were secretly send by authorities to people tables around of the country excepting Moscow and St.Petersburg.
- 12, 000 people were hospitalised during first 2 weeks after Chernobyl. But it was top secret. They all became suddenly “heath” because the authorities secretly made higher from 10 to 50 times the radioactive doze to people.
- 3, 000, 000 children received critical dozes of radiation for their health.
- 148, 000 people in Ukraine were died only during first ten years after Chernobyl explosion.
- according to the data of the Committee of liquidators about 100, 000 of them already died. There were 800, 000 liquidators.

- according to the data published by Belarusian scientists in Swiss Medical Weekly the cancer increased for 40% between 1990 and 2000. In Gomel region it is even more higher – 52%. They compared the post Chernobyl period with rates before the accident on April 26, 1986.
- In 2000 the UN experts predicted that the worst was still to come for more than 7 million people affected by the disaster.
- The World Health Organisation researchers reported that the Chernobyl disaster will case 50, 000 new cases of thyroid cancer among young people living in the worst-effected regions.

New soviet's secret documents I found and exclusively released in Salzburg for mass media and during my public meetings show that 75 million people of he former USSR were covered by Chernobyl's radio nuclides (!).

Mr.Kofi Annan said “Chernobyl is a world we would all like to erase from our memory. More than 7 million of our fellow human beings do not have the luxury of getting. They are still suffering every day, as a result of what happened’. Mr. Annan said the exact number of victims may never be known, but that 3 millions of children require treatment and “many will die permanently”.

Who did response on that crime against millions people against humanity? These who cover up the truth on Chernobyl nuclear explosion must finally to response!

Exactly for such a goal we establish together with Rosalie Bertell our joint initiatives. We would like to organise an international group of scientists, lawyers activists and victim of Chernobyl to prepare special appeal to European Court and to organise International ‘Chernobyl Nurenberg” for the former soviet authorities who cover up Chernobyl. There is no limited time for crime against humanity!
